Angus & Club Calf
Female & Bull Sale

SR

Friday, November 12, 2010 - 1:00 PM

Drew Ranch - Hearne, Texas

SF

A Note From Solid Rock Ranch & Stewart Family Livestock

Welcome to the first joint production sale for Solid Rock Ranch and Stewart Family Livestock. We are excited about the cattle being offered in this event. Kent Stewart and his family and I have been friends a number of years and share a similar philosophy and appreciation for good cattle. We are confident that this offering has genetics that will benefit a variety of producers from purebred Angus, Charolais and Shorthorn to elite club calf programs. From the outstanding spring born show heifer prospects to the flushes on proven and unique donors, there is something to fit a variety of programs. Functionality is one of the key emphases of both of our programs. Balanced EPD's with sound structure and enough capacity to consume and digest a typically low quality forage diet along with added eye appeal and overall phenotypic excellence are the foundation for our selection and mating decisions. The bulls selling are all 20 months and older and are ready to go to work.

All of the live lots selling are young, born in 2005 and later, with many first and second calf females along with many of their calves and a select group of bred heifers and open heifers ready to breed. The flush lots being offered include some of the top young females as well as older and more proven cows. The Angus females selling offer some genetics not typically seen in Texas including some truly extraordinary spring heifer calves by Connealy Thunder and their dams. These heifer calves may be the best live lots selling, they are special. Also selling some really nice females by Bextor Final Answer, 004, Mainline and more. The Connealy Jauer 747 and CCR Dedication 341J4 females are very productive and the cross between the two has worked very well. Included at the side of the fall calvers are some of the first Chisum calves to sell in Texas. They are an impressive set of baby calves, check them out. Also selling some of the first females in Texas carrying the service of L T Bandwagon 3105, the balanced trait Right Time son out of a picture perfect dam.

All of the live lots selling are AM, NH and CA free, either by DNA test or due to their pedigree. All of the flushes selling are also AM, NH and CA free except two exceptional Future Direction daughters selling as part of the choice flush lot 4. They are only included because of their potential value in a club calf program.

To close, I want to thank the many people we have had the opportunity to work with in preparing for this initial offering. Robbie Schacher and Matt Sims have taken most of the photographs presented in these pages and have offered valuable council and advise. Kate Miller has coordinated catalog and advertising activities. Tracy McMurphy started out doing the design work but due to the pending birth of her child was reluctant to start the catalog when she knew she might not be able to finish it. Kylee Willard did all the ads after the initial one, and she has done an outstanding job for us. Fiona Lockhart prepared the catalog on short notice, and we are grateful.

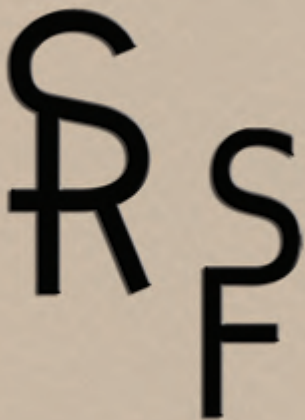

Thanks for your consideration. We look forward to seeing you Friday, November 12, 2010. Call or email, we can answer any questions.

Welcome, it is with great pride and pleasure that I am writing this letter for our first sale in Texas. I am proud to be associated with a good man, Matt Jones, and good cattle from Solid Rock Ranch. Our goal has been to produce stout, fertile, practical cattle with a good look. Our cattle get a wide variety of use. They are used by commercial cattleman, seedstock producers and also for club calf genetics. No matter the use, we believe the cattle should reproduce efficiently, economically, and work for a living, but still be appealing to the eye. I am not big on long winded speeches, so let the cattle speak for themselves.

Please call with any questions you might have.

Thank you,
Stewart Family Livestock

Fall Pairs

In the interest of their safety, fall born calves will be left in the pens and not run through the ring. Please view them before the sale.

Absentee Bids

You may contact the owners, sale manager or any member of the sale staff, or view the sale live online at liveauctions.tv.

Updated Information

Sale supplements and updates will be available prior to the sale. All announcements from the block take precedence over printed materials.

Terms and Conditions

Owners stand behind the cattle selling. Terms for flush lots are listed with the lot. All lots sell under the suggested terms and conditions of the American Angus Association. All animals selling are free of AM, NH and CA either by parentage or DNA test, except two Future Direction daughters that are part of the choice flush lot 4. They are denoted in the catalog.

Payment

Payment is due at the conclusion of the sale unless prior arrangements have been made. Each lot will be sold to the highest bidder. The auctioneer will settle any dispute as to bids.

Health Papers

Health papers for interstate shipment will be available.

Trucking

Larry Smith Livestock, (817) 832-3032

Liability

All persons attending the sale do so at their own risk. The owners, property owner and sale management assume no liability, legal or otherwise, for any accidents or injury that may occur.

Directions (See Map on Inside Back Cover)

Sale facility is on the south side of FM 391, 2.4 miles east of Hearne, TX.

From the north on Hwy 79: Exit south (left) on FM 2549 in Elliott, TX between Franklin and Hearne. Go 6.0 miles to FM 391. Go west (right) 1.6 miles.

From the south on Hwy 79: At intersection of Hwy 79 and Hwy 6 in Hearne go straight on FM 391 (do not exit) across overpass. Stay on FM 391 for 2.5 miles.

From Hwy 6 in Hearne: Exit west on W. Brenken St. one block south of Hwy 6/Hwy 79 S. intersection. Go two blocks west to Cedar St. Turn right and go one block north to Hwy. 79/FM 391. Go 2.4 miles east on FM 391.

Entire offering is free of AM, NH & CA except 3114R and 4876R which are part of Choice Flush Lot 4

Selling a Flush on Lot 1 and Lot 2

At Stewart Family we value the standards established by Bradley 3 Ranch and are fortunate to have purchased the 7079 and 8093 cows. Their daughters by EXT and BC Maverick 2702 are nothing less than phenomenal and the potential with other sires is unlimited. The Bradley 3 Ranch donor program is perhaps the most stringent in the country. Before a cow will be considered as a donor she must be at least 10 years old and have at least 8 calves with an annual calving interval. Her progeny must ratio above herd average for weaning, yearling, ribeye area, and intramuscular fat. All of this is done while surviving on Texas panhandle native country with minimal supplementation. This stringent criteria establishes a demanded level for fertility, longevity and industry demanded carcass value. Many of the Bradley donors have maintained a productive career of 12-14 years of age and beyond.

The 7079 cow sets the standard for phenotype and progeny performance. She has generated over \$90,000 in sales for Bradley 3 Ranch. They have retained 7 females in their herd and one herd sire out of the 7079 cow. Her influence is far reaching. The 8093 cow has generated \$13,250 in sales and has 3 females back in the BR3 herd. We have calves on the ground by EXT and Oh My. At 12 years of age, this female is impressive in terms of udder quality power and production ability. We believe 8093 is the kind of cow that a cow herd could be established around. If you are searching for the right female that can produce cattle with extra soundness stoutness and design, here is your opportunity. Flush your choice to an Angus sire to create seedstock that will lead your herd for generations to come. Flush your choice to a clubby bull and we will see you with a purple banner.

Selling one flush to the bull of the buyer's choice. Guarantee of 6 to 10 transferrable embryos. Buyer has the option to purchase any embryo over 10 at the prorated price per 6 embryos. Seller will pay collection costs (IVF for 7079 and conventional for 8093). Buyer is responsible for semen and freeze or transfer fees.

The flush lot including Deer Creek Ext 335 or her descendents is a rare opportunity. To date, I've only sold one female descendent from her. The Deer Creek EXT 335 donor has been a cornerstone in my program. It is not very often to be able to own a female that has made the kind of impact she has made for me. She combines soundness, capacity, productivity, slick hair, maternal ability, fertility and overall functionality in a very attractive package with highly proven genetics (EXT X Scotch Cap X Shearbrook Shoshone). At 14 she is still very sound, but years of eating Bahia have taken their toll and her teeth are gone. This will be one of the last opportunities to gain genetics directly from her. In addition to the foundation Queen 335 donor, the buyer has an opportunity to select from her descendents including a Final Answer daughter (335W4) that may be her best daughter yet. The dam (335T6) and granddam (335R8) of a phenomenal spring 2010 Thunder heifer are included in this flush lot. Other Queen 335's are a super producing Lemmon Newsline daughter (335R4), her daughter by Final Answer (335U5), a CA free 5175 daughter (335M), and a beautiful Connealy Jauer 747 daughter (335T4) that is the dam of a Final Answer son working in the Langford Cattle Company herd. Any descendent of 335 that has calved or will calve through next spring is eligible. Open heifers that have not calved are the only descendents excluded.

Selling one flush to the bull of the buyer's choice. Guarantee of 6 to 10 transferrable embryos. Buyer has the option to purchase any embryo over 10 at the prorated price per 6 embryos. Seller will pay collection costs (IVF for Deer Creek Ext 335 and conventional for other females). Buyer is responsible for semen and freeze or transfer fees.

Lot 4 - Choice of Flush on Solid Rock Ranch Fall Calvers

This flush lot pick of the fall calvers includes your choice of any of the fall calvers not included in the lot 3 flush. It includes some really special females, most with tried and true pedigrees, that could add equally well to either a purebred Angus program or a club calf program. Some highlights include a very complete Emblazon daughter (308N) of the Partisover Witch 308 donor (New Trend X Power Play X Shearbrook Shoshone), a maternal sister (639T2) by Contrast to one of the top young cows selling (lot 21) who in turn is the dam of probably the best spring heifer calf in the sale (lot 21A), a proven PAPA Durabull daughter out of the former Twin Eagle's donor Finks Bonnie 6241 361 71 that invariably weans the heaviest calf each year (769L), a top producing Northern Improvement daughter out of a Jorgensen cow that throws really complete, cool fronted and attractive calves (2243L), her feminine yet powerful daughter by Index (2243T3), a couple of phenomenal Future Direction daughters that would create an awesome female base for a club calf program (3114R and 4876R), a Freightliner daughter (4876R2) of the foundation Lucy 4876, descendents by Bextor (5028U and 5028U2) and Connealy Jauer 747 (5028T) of a big ribbed and big hipped Drake Farms, Emulous bred "Big E" daughter.

The two Future Direction daughters included in this lot would be ideal to create a foundation set of females for a club calf program. These two are probably the best Future Direction daughters I have seen. They are carriers for AM and NH and are the only animals being offered either as live lots or as flushes that are carriers for AM or NH.

Selling one flush to the bull of the buyer's choice. Guarantee of 6 to 10 transferrable embryos. Buyer has the option to purchase any embryo over 10 at the prorated price per 6 embryos. Seller will pay collection costs (conventional). Buyer is responsible for semen and freeze or transfer fees.

Sold for \$9,000
Hoodoo Crook 7118 x Hoodoo Ms George Z0116
Maternal Brother to Flush Cows

Lot 5 - Selling a Flush in choice of Two Straight Hoodoo Daughters of Hoodoo Ms George Z0116

The pick of the flush from the two daughters of Z0116 in its own could compliment anyone's Charolais or club calf program. The Z0116 cow produced more revenue than any other Charolais cow in Camp Cooley ranch history to date. A yearling maternal sister to 309 and 116P8 by Firewater was the featured lot 1 and 2nd top selling female in the Northern Exposure sale 10/2/10 for \$16,500. There are also herd sires currently in use. 116P2 aka "George" has produced high quality bulls, steers and heifers in the Stewart Family and Greg Sanders herds. Two bulls are in use at Stewart Family and a heifer has been kept back. The steer crop was highlighted by the most recent Grand Champion shown by Kolton Schuler at the Brazos County Fair. Remember these are 100% Hoodoo genetics and are registered to boot. This is extremely hard to find these days.

Selling one flush to the bull of the buyer's choice. Guarantee of 6 to 10 transferrable embryos. Buyer has the option to purchase any embryo over 10 at the prorated price per 6 embryos. Seller will pay collection costs (conventional). Buyer is responsible for semen and freeze or transfer fees.

Lot 6 - Selling A Flush in Choice of the rest of the Charolais Females

This Hoodoo flush is just as exciting as the other. It showcases the Z6017 cow line touted by many as the best Hoodoo cow to ever come out of the original Hoodoo herd in Wyoming. The Z6017 cow has generated over \$200,000 in revenue including \$20,000 and \$9,000 heifer lots in the 2009 Cream Of The Crop Sale. Most recently a \$9,000 bull sold in Kris Black's bull sale. She is also the dam of B/T Smart Choice M207 ET. A \$12,000 flush has also been recorded by this great female. This choice flush offering includes three Hoodoo Crook 9010 daughters of Z6017, MCF Miss Hoodoo 37L who sold for \$15,000 at Mid Continent Farms sale in fall 2001 as a heifer and many more Hoodoo influenced females (most are straight Hoodoo).

Selling one flush to the bull of the buyer's choice. Guarantee of 6 to 10 transferrable embryos. Buyer has the option to purchase any embryo over 10 at the prorated price per 6 embryos. Seller will pay collection costs (conventional). Buyer is responsible for semen and freeze or transfer fees.

Lot 7 - Selling a Flush in Choice of 3 Maternal Sisters

The 517 family that we started our Shorthorn program with stems from old Maine genetics, she traces to Cunia six times and also to Epinal and Covino III. She was unbeaten as a cow calf pair in 1998. Every female produced has been kept in our program and is in production. The only female ever sold was out of the 517N cow and sold to Jimmy Duke for \$5,000 for 1/2 interest. Not only have we kept every daughter, but we also have three herd sires in use. These herd sires include Buttzilla and an X30 son, both out of 517M. Another herd sire we are utilizing is a purebred Shorthorn out of 517N that could be the very best son of Proud Jazz. Our confidence in the 517 cow family is extended to you through 517M a Warhorse daughter, and two Bad Moon Rising daughters 517N and 517R. We have flushed 517M and 517N with great success. This very well may be the only time to get in on these ground floor genetics.

Selling one flush to the bull of the buyer's choice. Guarantee of 6 to 10 transferrable embryos. Buyer has the option to purchase any embryo over 10 at the prorated price per 6 embryos. Seller will pay collection costs (conventional). Buyer is responsible for semen and freeze or transfer fees.

STEWART FAMILY LIVESTOCK CLUB CALF HEIFERS

Lot 8 - Charolais X Maine Composite Heifer

8

Charolais X Maine Composite Heifer

DOB: 04/22/2010 Cow Sire: Buttzilla

These two Charolais composite females are very exciting to look at and also for the use as breeding pieces in a haired or slick sheared program. These two hairy ground pounding females combined the genetics of Z0116 and 517M on the top side of their pedigrees. Just look at these big-boned, stout females. They speak for themselves.

**Seller is retaining a right to a flush out of each heifer in the future.
Flush will be done at the buyer's convenience and at the seller's expense.**

LOT 26A: Heifer calf born 8/19/10 by CAR Efficient 534. BW: 38lbs Tattoo: 0054

Selling choice in these three Dixie Erica's. 824S4's son, S Rock Walker 824U3, has been retained and used as a herd sire in the Solid Rock program. He exhibits the soundness, rib shape and depth, attractive front and hip typical of the Dixie Erica's. I am really excited to see his first calves. 824S4 is a moderate, complete and attractive female who is the right kind to build a program around.

Stylish Final Answer heifer should work in either the show ring or cow herd. Final Answer has done a tremendous job for me, especially when crossed with the Jauer 747 bred females. These females have good performance with low BW, moderate mature size and added capacity. They are sound and look like females that should stay in the herd for a long time.

AI 4/29/10 to Connealy Thunder. PE 5/15/10-7/31/10 to S Rock Clarity 3114U. Expected to calve 2/8/11 to Connealy Thunder.

Contrast daughter out of a top producing 1407 X Prime Time female. Consistent low BW and high marbling genetics in this family. 4545T ratioed 71 for BW with a -1.9 EPD and 119 for IMF with a .52 MARB EPD. Maternal brother sells as probably the top Calving Ease and most balanced overall EPD profile in the bull sale. Thunder calf she is carrying should be a good genetic combination. Son sells as lot 69.

AI 4/9/10 to L T Bandwagon 3105. PE 4/24/10-7/15/10 to S Rock Walker 824U3. Expected to calve 1/19/11 to L T Bandwagon 3105.

Maternal sister to the previous lot by Preference. This slick haired bred heifer is really flashy. Safe to Bandwagon, the Shaw Cattle Co. herd sire, whose sons have consistently been their top selling sire group going to commercial customers in big range country. Bandwagon is a Right Time son out of a phenomenal Sitz Value daughter.

Stout, big ribbed, big hipped Final Answer son back to the 044 daughter that is the foundation for the Elira 639 family in the Solid Rock herd. His dam was wedged into a hay stack in a storm and died when he was one month old. He stole enough milk to survive and really performed. He ratioed 99 at birth and would have ratioed well over 100 for WW, YW, REA and IMF. Compared to that set of bulls, he had the 2nd highest WW and SC, 3rd highest YW and REA and far and away the highest IMF (would have ratioed 146). Definite herd sire candidate.

Lot 63 - S Rock Efficient 639W4

Attractively made CAR Efficient son with a stout hip and a lot of rib. Balance trait calving ease bull with much more stoutness than most heifer bulls. His dam is a really moderate framed female with a ton of rib that consistently produces good cattle with a lot of performance. She has produced sons that have sold in 2006 and 2007 for \$2,500 and \$3,750. One of her daughters is part of the foundation of the Brent Holmes herd near Teague, TX.
